

Eunyul (Estelle) Kim estellekimdev.com | (714) 719-5688 | kestelle@sas.upenn.edu

Software Engineer focused on real-time systems, graphics, and interactive tools

University of Pennsylvania, c/o 2027 GPA: 3.5 / 4.0

Dual Degree MSE + BSE: Computer Science, Digital Media Design (Computer Science, Design/3D, Computer Graphics)

WORK EXPERIENCE

Incoming SWE Intern @ PayPal — San Jose, CA	2026
• Building frontend and full-stack systems for PayPal’s Digital Wallet platform	
Mobile App UI Designer @ tally — New York, NY Remote	2026
• Designed end-to-end mobile UI, interaction flows, and system structure for a habit-based fintech startup	
• Defined interaction patterns and interface logic across onboarding, contracts, and verification systems	
Data Visualization & Engineering Intern @ Southern California Edison — Rosemead, CA	2025
• Designed and optimized ETL pipelines serving a utility with 15M residents, positive feedback & return offer	
• Worked directly with cross-team stakeholders to deliver 10+ production data solutions under tight timelines.	
Frontend Web Developer @ Children’s Hospital of Philadelphia — Philadelphia, PA	2025~
• Developing ML-driven research management hub for autism studies using React, TypeScript, and REST APIs.	
• Implemented scalable data visualization & state management components to streamline researcher workflow.	

PROJECTS

Mini Minecraft — C++, OpenGL, GLSL	2024
• Built a ground-up voxel game engine with a custom OpenGL rendering pipeline (team of 3).	
• Implemented VBO-based terrain, procedural sky shaders, and real-time water waves and reflections.	
Internet Atlas — Three.js, D3.js, React, Pinecone, FastAPI, Supabase	2025
• Technical PM for a 3D data visualization interface exploring large-scale browsing data (300 nodes, 1000+ edges).	
• Designed custom ML pipeline embedding the feel and ambiance of a website based on visual and textual data	
• Built an interactive 3D force-directed graph with custom camera movements, interactions, and SVG animations	
Into the Blue: Virtual Museum Experience — React, Next.js	2024
• Developed browser-based storage and scalable camera-to-sticker pipeline for museum exhibition experience.	
• Currently maintaining production deployment for 9+ months for 180k visitors with consistent performance.	

ACTIVITIES

Vice President (External), 3x Project Lead, Full-Stack Developer @ Penn Spark	2024~
• Manage corporate relationships and partnerships for Penn’s largest community of creative devs and designers.	
• Led redesign and rebuild of Spark’s website, improving information architecture, branding, and maintainability.	
• Led 3 full-stack product teams; scoped features, shipped apps to hundreds / thousands of users.	
Industrials Committee @ Wharton Investment & Trading Group	2024~
• Applied financial modeling + competitive analysis, and pitched in intercollegiate competitions.	
Governmental Affairs Director @ California Association of Student Councils	2024
• Authored & passed 3 CA laws, facilitated a 20-organization coalition including ACLU and Human Rights Watch.	

SKILLS/ACHIEVEMENTS

Languages: Python, C++, Java, TypeScript, JavaScript, SQL, GLSL, HTML/CSS
Frameworks: React, OpenGL, WebGL, Next.js, React Native, Node.js, Django, PostgreSQL, MySQL, Supabase
Concepts: Rendering Pipelines, GPU Programming, Computer Graphics, Real-Time Systems, Data Pipelines, Machine Learning, Full-Stack Development, Systems Programming, Design Engineering, Prototyping, Interactive Interfaces
Tools: Figma, Adobe Creative Suite, Maya, Docker, AWS, Github, Git, Arduino (Electronics), Blender, TouchDesigner
Achievements: 3× AIME qualifier (top 2.5% nationwide); Korean TOPIK II Level 6 (highest).
